

SELLER GUIDE

Selling on TestMandi

A complete walkthrough from creating your seller account to publishing and selling your first MCQ test — for teachers, institutes, schools, and exam bodies.

1 Register as a Seller

1. Go to **testmandi.in**.
2. Click "**Log in / Register**" in the top-right corner.
3. On the sign-up screen, select "**Teacher / Institute (Seller)**" — not Buyer or Advertiser.
4. Fill in your contact name, institute/brand name (this is what buyers see), email, phone number, and a password of at least 8 characters.
5. Click **Register**.

You're logged in immediately after registering — no waiting period.

2 Verify Your Email

- After registering, an amber banner appears: "*Please verify your email address.*"
- Check your inbox for a TestMandi email with a **Verify email** link and click it.
- Didn't get it? Click "**Resend email**" in the banner.

Verifying isn't required to use the site, but it's good practice to do it early.

3 Set Up How You'll Get Paid

Before withdrawing any earnings, add your payout details in **Seller Studio → Bank & payouts**. Add at least one of:

- **UPI ID** (e.g. `yourname@upi`) — fastest to set up
- **Upload your UPI QR code image** — a photo/screenshot of your existing GPay, PhonePe, or bank app QR code
- **Full bank details** — account holder name, bank name, IFSC code, and account number (entered twice to confirm)

Click **Save payout details**. Having UPI or a QR code on file makes it much faster for the admin team to pay you.

4 Create Your First Test

In Seller Studio, click "+ **Create test**" to open the 3-step wizard.

Step 1 — Basics

- **Test title** — be specific, e.g. "NEET Biology — Genetics & Evolution Sprint"
- **Category** — choose from the list (NEET, JEE Main, UPSC CSE, etc.)
- **Duration** — minutes given to complete it. The test **auto-submits** the moment time runs out.
- **Price** — what buyers pay, in ₹
- **Description** — what it covers and who it's for

Step 2 — Questions

For each question: the question text, **4 answer options**, which one is correct, a **topic tag** (powers the topic-wise breakdown in score reports), and an optional explanation. Add as many as you like — at least one complete question is required to publish.

THREE SHORTCUTS FOR ADDING QUESTIONS FASTER

Upload CSV — export questions from a spreadsheet as `question, option1-4, correct (A-D/1-4), topic, explanation` and upload the whole file at once.

Generate with AI — type a topic and a count, and the platform writes a full set of questions for you in seconds.

Scan question paper — upload a photo of a printed question paper and the AI extracts the questions automatically.

However you add them, review every question carefully before publishing — you're responsible for their accuracy, especially anything generated or scanned.

Step 3 — Review & Publish

Check the summary, then click **Publish test** — it goes live in the Marketplace immediately.

5 Bundle Tests Together *(optional)*

Once you have 2 or more published tests, click "**Bundle tests**" in Seller Studio: give it a title and description, select which tests to include, and set a bundle price lower than the sum of the parts to show buyers a real saving.

6 Promote Your Test

Every test and bundle card has a **share icon**. Use it to copy a direct link or share on WhatsApp — the link opens straight to that specific test with a "Shared with you" spotlight, not just the general homepage.

7 Track Sales & Withdraw Earnings

SELLER STUDIO SHOWS

Gross sales · Your earnings (after platform share) · Platform fee · Units sold — plus a row per test/bundle.

In **Bank & payouts**, click **Withdraw** once you have an available balance. If real bank-transfer payouts are enabled on your account, this happens automatically. Otherwise, it's queued for the TestMandi admin team to pay manually via your UPI/QR/bank details — status moves from *Pending* to *Completed* once paid.

8 Refer & Earn — a Second Income Stream

Every seller gets a personal referral code, shown in the "**Refer & earn**" panel in Seller Studio, just below Bank & Payouts. You earn a flat **₹200 cash bonus**, credited straight to your payout balance, in two ways:

- **Refer another seller** — earn ₹200 the moment they publish their first test.
- **Refer a student or buyer** — earn ₹200 the moment they complete their first purchase.

Share your code using the **Copy invite link** or **Share on WhatsApp** buttons right in the panel. Every bonus you earn shows up in a running history with who triggered it.

Referral bonuses sit on top of your normal sales earnings — they're not reduced by the platform's profit-split percentage, since they're funded entirely by TestMandi.

Tips for a Strong Listing

- Use a clear, specific title — buyers search by keyword.
- Tag each question's topic accurately — it's what makes score reports genuinely useful, and useful reports earn better ratings.
- Watch your rating: tests crossing **10 ratings with an average below 3 stars are automatically hidden** from the marketplace.
- A well-priced bundle is often the easiest way to increase what a single buyer spends with you.
